

Gaurav patel

Full-Stack Developer

 gaurav patel

 Indore, Madhya Pradesh

 gauravpatel41234@gmail.com  6268694191

Full Stack Developer with expertise in React, Redux, Material-UI, Node.js, Express, MySQL. Skilled in frontend & backend programming, JavaScript language & its frameworks, web designing, web development, API development, secure authentication (JWT, bcrypt), & project management. Strong foundation in computer science and building responsive user interfaces.

SKILLS

Frontend Development - Excellent

HTML, CSS, Javascript, React.js, React Router, Redux, Redux Toolkit, Redux Thunk, RTK Query, Web Design, Context api , JavaScript Frameworks, Bootstrap 5, Material-UI (MUI), TypeScript, Next js

Backend Development - Intermediate

Node.js, Express.js, Multer, JWT (JSON Web Token), Socket.io, MVC, Password Hashing, Object-oriented programming (OOP)

Database Management - Intermediate

SQL, MySQL, Sequelize, MongoDB, Mongoose, RDBMS (Relational Database Management System), DBMS (Database Management System), Firebase

Cloud Services & Storage - Basic

AWS EC2, AWS S3 Bucket, AWS RDS (Relational Database Service), Cloudinary, AWS Lambda (Serverless)

Tools & Technologies - Excellent

Git, GitHub, VS Code, Figma, Data Structures, Algorithms, DSA

Soft Skills - Excellent

Attention to detail, Management Skills, organizational skills, Team Collaboration, Leadership, Communication, Adaptability

PROJECTS

LinkedIn Job Automation Tool (React | Node.js | MySQL | Chrome Extension)

A full-stack job application automation tool with a Chrome extension, React dashboard, and Node.js-MySQL backend to streamline LinkedIn outreach and bulk applications.

- Developed a full-stack automation platform combining a React web app, Node.js backend, MySQL database, and a custom Chrome extension to streamline LinkedIn job applications.
- Built the Chrome extension to scrape recruiter emails from LinkedIn hiring posts and sync them with a MySQL database via RESTful APIs.
- Designed a dynamic HTML email templating system to enable personalized outreach and improve response rates.
- Implemented a Contacts Dashboard in React to display recruiter data and support one-click bulk applications, significantly reducing manual effort and increasing interview callbacks.

React.js, Redux, React Router, Github, Node js, Express, Json web token, SendinBlue (for sending mail), Mysql

WORK EXPERIENCE

Maitri-Tech-Solutions :- <https://www.maitritech.in/>

(Jun 2020 - Present)

Senior Software Engineer

Worked as a Full-Stack Developer for over 5 years, contributing to the development of diverse web applications leveraging React, Material-UI, Node.js, Express.js, and Redux.

Key Projects and Contributions :-

Hotel Management System

- Designed and implemented a comprehensive order management system in application, streamlining order processing, tracking, and reporting.
- Developed robust authentication features including login, signup, system user login, and password recovery, ensuring secure user access.
- Engineered a dynamic role-based access system to manage permissions effectively for hotel admins, staff, and users.
- Created an intuitive interface for restaurant listings with integrated user review & rating functionality.
- Developed a product management system featuring detailed product pages, review capabilities, and organized product categories for enhanced navigation.
- Built a comprehensive room management feature for hotel staff.
- Implemented a user management system allowing hotel owners to add and manage staff and administrative users.
- Developed a complaints management feature to handle and resolve user grievances efficiently.
- Integrated Socket.IO to provide live updates for order and requests, ensuring real-time communication.
- Utilized RTK Query for efficient API calls and state management, coupled with manual cache updating to optimize performance.
- Built & maintained the backend using Node.js & Express.js, providing robust foundation to application.
- Implemented push notifications using Firebase, ensuring seamless real-time alerts.
- Technology Stack :- React.js, Redux Toolkit, JavaScript, MUI, Node.js, Express.js, MySQL, Firebase, Git

CEC Application (React.js | TypeScript | Node.js)

- Developed for a US-based client, the CEC (Collaborative for Educational Services), which supports schools across New York State with student-focused educational programs.
- Developed weekly log forms for student interventions (individual & group-based), integrated with teacher and student data.
- Used PXQuery for custom query handling, including joins, filtering, and transactional inserts.
- Implemented form logic for conditional fields (e.g., school vs. BEDS code) based on account type.
- Handled real-time updates, date filtering with Moment.js, and role-based workflows.
- Tech Stack: React.js, TypeScript, Redux Toolkit, PlatformX UI Library, PrimeReact, Styled Components, Moment.js, React Router v6, Webpack, Sass, Node.js, Git
